THE PLUG-IN CABINET THAT EVOLVES WITH YOUR STORE.

Faro is a family of plug-in vertical and semi-vertical cabinets with glass doors, designed to meet the needs of small and medium size supermarkets, mini-markets and speciality stores. This compact, versatile solution comes in medium and low temperature versions, allowing the entire store to be furnished with just one range of cabinets.

INTEGRATED MOTOR, TOTAL FREEDOM.

Installation is simple and straightforward thanks to an integrated motor and R290 natural refrigerant. There is no need to connect to a remote refrigeration system and the services of specialist technicians are not required. In addition, their “plug and play” design allows these cabinets to be moved and repositioned easily for seasonal campaigns and promotions.

R290 GAS: EFFICIENCY AND RESPECT FOR THE ENVIRONMENT.

R290 natural refrigerant is an environmentally friendly and efficient choice that reduces environmental impact and optimises consumption. It is one of the practical solutions that Arneg has adopted to support its commitment to sustainable technologies that combine performance and reliability with respect for the environment.

THE TEMPERATURE YOU NEED.

MT version

Ideal for the preservation of fresh products, the MT (Medium Temperature) version ensures optimal display conditions for cold cuts, cheese, dairy products, soft drinks and other packaged products.

LT version

Perfect for frozen food, the LT (Low Temperature) version of the Faro family guarantees constant and safe refrigeration even at low temperatures.

LX DESIGN: QUALITY IN THE SPOTLIGHT.

The LX design ensures style and elegance in any setting. Fully transparent doors add value to the products on display, while a lower bottom front panel maximises visibility and improves access. In addition, automatic water evaporation eliminates the need for drainage, further simplifying installation and management.

COMPACT DESIGN.

Designed for use in stores where space has to be optimised, **Faro** offers both compactness and capacity. Despite a minimal footprint, load capacity is high thanks to an efficient, multi-deck configuration. This makes Faro the ideal solution for maximising display space while maintaining tidiness and ease of access in every department.

SEMI-VERTICAL FLEXIBILITY.

The **Faro** range also includes a semi-vertical version in two heights, H170 and H155, to suit different layout and visibility requirements. This solution maintains all the advantages of plug-in systems, offering greater freedom in store layout and improved management of display space.

FOCUS ON VERSATILITY.

This family of cabinets is designed to display a wide range of packaged products: meat, fish, cold cuts, cheese, dairy products, pre-packed fruit & veg, frozen food and soft drinks. Such versatility allows all major product categories to be displayed by just one family of cabinets, optimising installation times, investments and store management.

ALWAYS THE RIGHT STYLE.

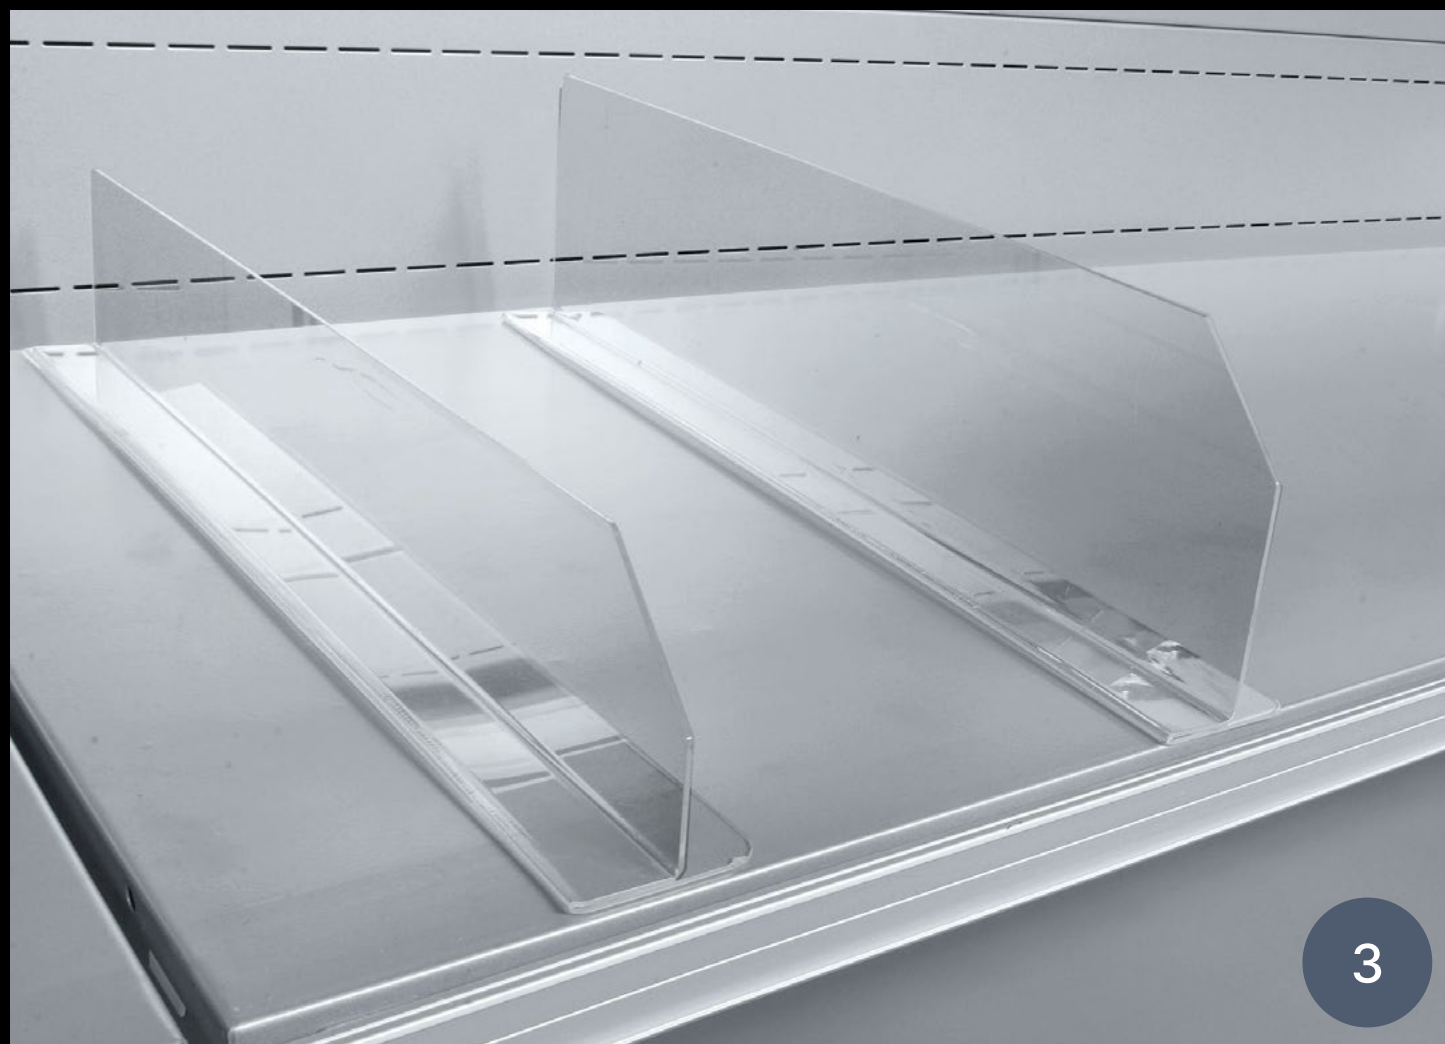

Faro is available in different sizes to match the space and display requirements of all stores. Finishes, materials and colours can also be customised to create solutions that perfectly complement the look of your store.
